How this was worked out

- Your dentist is out of network. The plan pays based on the in-network allowed amount of \$1,200.00.
- Your \$50.00 deductible was applied first. The plan then paid 50% of the remaining \$1,150.00 (crowns are major care).
- Because the dentist is out of network, they may bill you the \$300.00 difference between their charge and the allowed amount (balance billing).
- You can ask your dentist whether they will accept the allowed amount, or ask for a payment plan.
